# MASSFEM EXCLUSIVE WEBINAR:

## Floodplain Design, Construction, + Impacts on Flood Insurance

This course provides insight into the importance of proper foundation flood vents and dry floodproofing techniques for buildings located in a flood zone. It will identify FEMA, NFIP, ASCE, ICC, and Building Code regulations, codes, and standards as they relate to sustaining foundations and overall business continuity in flood hazard areas and analyze the role of building compliance in securing lowering flood insurance rates and what mitigation solutions are available. After the course, participants will have a thorough understanding of floodproofing options and the important role they play in designing a sustainable structure.

Featuring Brian Newman, a Flood Mitigation Specialist @ Floodproofing.com

WEDNESDAY, MAY 13 @ 10:00AM - 11:00AM
